Decision and contributions

Funding. Group-selected principal matching: 2,400 Beta, 1,200 Gamma, 2,400 Delta.

Stocks. Original Sample MV weights retained after revised funding.

Evaluation. The 2023-2025 results are a separate conditional test, not a 2022 model input.

Human review. The group representative reports unanimous agreement with the recommendation; this does not constitute individually authenticated signatures or independent review of each file.

Provenance. Original emailed archive-member hashes and university acceptance have not been independently confirmed.

Academic integrity. Students report choosing investment ideas, methods, assumptions, securities, sources and document design. AI supported code, research, data processing, calculations, QA and editing under human decision control.
